Date of Birth: 1987-06-12

Status: Living with girlfriend in a small apartment in Sundbyberg, Stockholm.

Current occupation:

- Since 2007-08-06 I study Digital Media at Hyper Island, Stockholm, Sweden. It's a two years long work-preparing education where I intend to improve my skills within project management and design. The school works with a "learning-by-doing" system which means that the school don't have any teachers, classes or tests, but only project based cases taken forth by the business.

I am also the Chairman of the student organization since September 2007.

Working life experience:

Since 2007-06-30, I work on contract basis as a consultant for Albin Metals AB (stock listed) and SGV Industrier AB, concerning development and administration of their websites.

- From 2006-06-26 until 2007-06-30 I used to work as at SGV Industrier. The key processes of this company are hot stamping, die casting, machining, and automatic turning of parts made from brass, aluminum, steel and copper targeted for European automotive industry.

During my employment I have had various assignments. I started in direct production and then was given the opportunity to develop myself in other areas.

I was part of a project aiming to reduce and streamline the flow of inventory and worked about 4 months with internal logistics and material handling. During this period I also got a license for fork lift driving and heavy transports.

Next opportunity then came as we successfully completed our task. The company went public through a small cap list in Gothenburg and I was asked to take full responsibility for developing the webpage's concerning the new stock listed company as well as renew all information in my current company. The results was more than satisfying for my employer and also helped me to come to the conclusion that I should educate myself in this area, because I came to the insight that I really enjoyed doing this and wanted to do this for a living.

As a person I enjoy when there are expectations and demands on me, combined with a lot of projects going on at the same time, both individual work and work together with colleagues and external parties. This give me a chance to develop and I see it as education, which is important for my satisfaction and make me feel good as a person.

- From early spring 2005 until June 2006 I worked part time as a group fitness instructor at a local Gym in, Kalmar. I was an instructor in "Body Pump" and "To The Core". I'm also educated in lifesaving, and athletic medicine.

Education:

I graduated from the Technical program at the Lars Kagg, Secondary School, Kalmar, with focus on Virtual Design.

I was also a board member of the student organization for 1 year.

Driver license:

I have a driver license.

About me:

I'm a happy, open minded and very creative person who likes to work together with people. I have good management skills and often take the initiative. I'm not afraid of hard work or long working hours.

Language:

I am a native Swede.

I am fluent in English, both writing and talking.

I have a weak German that can be refreshed.

I look forward to a personal meeting and a hope that my profile have created an interest in me.

Sundbyberg 2008-03-13,

Björn Blomquist
